REASONS FOR ALLOWANCE

Claims 1 and 2 are allowed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Japanese patent document 4-341652 (A) cited by applicant has been considered. The examiner further cites Helquist '379, Nishimura et al. '515, Horsch '502 and Wolf et al. '539 which show multi-plate friction clutches with an annular spring disposed in a groove in a piston.

The following is an examiner's statement of reasons for allowance:

None of the prior art of record shows or suggests a multi-plate friction clutch including the specified piston and buffering Belleville spring in combination with the remainder of the structure set forth in claim 1, and particularly wherein the buffering spring is accommodated in an annular retaining groove formed in the pressing surface of the piston and the groove includes an annular projection formed at its axial opening edge for inhibiting disengagement of the spring from the groove.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
